ADV. CERTIFICATION IN CAD-MECHANICAL

INTRODUCTION

Mechanical CAD design and drafting training requires a solid foundation learning on 2D and 3D CAD through digital tools, workspace, and advanced commands. AutoCAD is used to create, view, manage, plot, share, and reuse accurate, information-rich drawings. At, TGC we have also trained students pursuing B.Tech or Diplomas in mechanical and looking for live project training during or after their course. We also assist student for their placements.

OBJECTIVE

This course is designed to teach CAD for Mechanical Design. The primary objective of the course is to teach the student the most powerful features and techniques for Annotations, Layouts, Standard Parts, Shaft Generator, Design Calculations etc. with comprehensive understanding of these features, students can begin to streamline the design process and shape mechanical design for their use. A number of mechanical projects and work books exclusively made by us, assure students a fruitful learning.

COURSE

Introduction to Working with the Windows Environment/ Creating Your First Drawing.

Starting AutoCAD and Understanding the Display, Interacting with AutoCAD AutoCAD File Operations, Setting up a Drawing, Using AutoCAD Drafting Tools, Understanding Objects etc.

Module 1

COURSE OUTCOME

- Certification that is preferred by employers, increases earning potential, and gives them a competitive edge in their job search.
- Understanding of civil design drafting.
- Work book containing middle to advanced level projects.
- Dummy/ Live Projects.

Viewing and Plotting a Drawing/ Basic CAD Drawing Technique/ Understanding Layers and Linetypes

Understanding the Display and Virtual Screen, Using ZOOM and PAN To Control the Display, Using the Aerial View Window and Creating Views, Setting the Display Format and Units, Working with Prototype, Working with Layers, Understanding and Creating Linetypes, Drawings, Coordinate System Basics.

Module 2

Creating Basic Geometry/Annotating with Text and Hatching/ Accurately

Working with Entity Points and Object Snaps, Using Point Filters, Drawing Rectangles, Circles Arcs, Adding Text to a Drawing, Filling Areas with Hatching etc.

Module 3

Creating Selection Sets/ Basic Editing Skills/Editing with Grips

Methods for Creating a Selection Set Selecting Objects, Changing the Selection and Using Object Selection Filters, Deleting and Restoring Objects, Moving, Copying, and Offsetting Objects, Rotating, Mirroring, Scaling, and Stretching Objects, Editing Edges and Corners of Objects.

Module 4

Adv.Drawing Techniques/ Dimensioning a Drawing/ Creating 3D Solid Modes

Working with Grips, Using the Grips Autoedit Modes, Dividing and Measuring an Object, Drawing Rings and Ellipses, Working with Multilines, Dimensioning Basics and Dimensioning with Precision, Linear and Radial Dimensioning, Angular Dimensioning, Editing Dimensions, What is Solid Modeling, Creating Predefined Solid Primitives.

Module 5

PROG. SCHEDULE:
WEEKDAYS & WEEKENDS

COURSE DURATION: 2 MONTHS
SCHEDULE: 2 HOURS/ 3 DAYS A WEEK
WEEKENDS: (SAT. & SUN OR SUNDAYS)

WHY TGC ?

TGC has a reputation both in the industry & among students & alumni for being one of the best Cad Design training institutes. Like all other TGC India programs, Cad Design is combination of classroom modules, assignments, live project, workshops, and compilation of portfolio. TGC conducts live project training for BTech and Diploma engineering students. TGC also assist students in getting placements at the end of the course.
